

Cirrus Mattress Replacement System

Features

The Cirrus system is a dynamic air mattress system that provides pain management and pressure reduction. Because of its unique construction combining air with a visco soft foam surface, the user is provided with a special degree of comfort and significant pressure reduction. The foam structure incorporating the alternating cells is key to pain management and enables the user to obtain a comfortable and relaxed posture in any position.

- Function: Prevention and treatment up to and including category 4⁽¹⁾. Suitable for very high risk patients and also medium to high as a preventative measure
